-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Title

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Specification

The disclosure is objected to because of the following informalities: a brief description of figures 11-13 is missing from the "brief description of the drawings" section. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 10 and 20 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 10 there is no antecedent basis for "the beam-splitter". Claim 1 refers to first beam-splitter and a second beam-splitter.

In claim 20 there is no antecedent basis for "the nonreciprocal optical element".

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 2877

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 1, 2, 4-17, and 19-22 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Tearney et al(6,134,003).

Tearney et al teach an optical coherence tomography interferometer comprising a short coherence source(2); a first coupler(66); a measurement path comprising a Faraday circulator(30), scanning endoscope(34), and a sample(14); a reference path including a Faraday circulator(30), and a reference mirror(12); a second coupler(166); and differential detectors(116). See figure 3. The coupler(66) is not a 50/50 coupler. The coupler splits the radiation such that the reference arm only receives enough power to obtain shot-noise-limited detection. The reference mirror(12) is scanned to provide the desired delay.

Allowable Subject Matter

Claims 3 and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The configuration of the reference path along with the rest of the limitations is not taught by the prior art of record.
